

OUR PRINCIPLES

The Southland's Mission Statement

“To stimulate, motivate and educate the children we care for”

At Southlands we promote and support children's welfare through the personal relationships that we develop with both the children themselves and their family.

As these are the most important years of a child's development, the experiences and stimuli to which our children are exposed will undoubtedly have a major influence in years to come. For this reason, at Southlands we recruit and nurture an outstanding team of individuals who collectively acknowledge and respect the individuality of each and every child within their care.

THE SOUTHLAND'S TEAM

Staff at Southlands have a common objective with you as a parent/carer; the desire to provide the best possible start for your child. As such the nursery revolves around a team of conscientious, caring individuals who bring a variety of expertise and knowledge to both of our nurseries.

The staff at Southlands have a consistent approach in providing a safe, stimulating and caring environment for your child. Each member of our team plays a full and active role in both our continuous assessment and professional development programmes.

Justifiably, we are proud of the opportunities that our nursery has provided in supporting our staff, which is reflected in the length of their service and loyalty.
